

TEACHING LAW & NEUROSCIENCE

In 2014 the first *Law and Neuroscience* casebook was co-authored by Owen Jones, Jeffrey Schall, and Francis Shen. Publication of the casebook and momentum in the field of neurolaw have contributed to the emergence of law and neuroscience courses in schools across the country. This year marks the publication of the second edition of the *Law and Neuroscience* casebook. Reflecting the speed at which the field is developing, 45% of cases and publications in the second edition were published since the first edition in 2014. The new edition includes over 600 new references and citations to recent developments, with 260 new readings, including 27 new case selections. This event will serve a book launch for the new edition, and will feature a dialogue between the co-authors of the casebook and two professors who are currently teaching from the new materials: Judge (Ret.) Nancy Gertner, who introduced the first Law & Neuroscience course at Harvard Law School, and neuroscientist Dr. Sally Bernardina Seraphin, who created the first Law and Neuroscience course at Trinity College in Hartford, CT.

All are welcome to learn more about the field of neurolaw, and **everyone in attendance will have a chance to win a free copy of the book.** Registration is required.
